

Supervising Civil/Structural Engineer

Company

Substation Engineering Company (SECo) is a full-service provider of Transmission, Substation and Distribution engineering and design services for Electric Utilities. Our corporate culture is rooted by our emphasis on providing high quality deliverables at a reasonable cost. We have a very experienced staff in all facets of transmission, substation and distribution engineering and design.

Job Description

Main Duties

Supervisor level civil/structural engineering position responsible for leading a team of engineers and structural designers related to the design of high voltage substations.

The following are duties that the lead will have familiarity with and can assign and/or self-perform or provide QA/QC for the work. Typical assignments include (but are not limited to):

- Performs design of reinforced concrete foundations and metal substation structures.
- Prepares engineering deliverables such as calculations, reports, and specifications.
- Performs routine research and develops recommendations for Construction methods and/or materials selection.
- Collects, assimilates, and manages data for engineering work.
- Prepares calculations following standard methods and principles used in similar engineering analysis.
- Oversees less experienced engineers and checks their work.
- Works with designers and drafters to guide the development of drawings.
- Interfaces with the Project Manager(s) and Clients.

Desired Education, Experience and Training

- PE Required.
- BSCE or higher with coursework in structural design and analysis and minimum of 10 years of experience.
- Computer proficiency required as well as strong analytical and problem-solving skills. Experience with MathCAD, STADD, L- Pile (or similar engineering software) is required.
- Accuracy and attention to detail is very important as well as having the ability to meet deadlines and complete assignments. Basic written and verbal communication skills in English are required.
- Commitment to customer service and ability to work in a team-oriented environment is critical.
